

## Satz Students Participated in the NJ Science Olympiad!

Congratulations to the Science Olympiad team, led by Ms. Fox and Ms. Suppa, on their participation and wins in the Science olympiad. The competition took place at Union County College in Cranford, NJ. 15 middle schools participated as well as 24 high school teams. They took home the following wins: 10th overall, 2nd in bridge, 2nd in green generation and 5th in disease detectives!

**Second place in the Bridge Event-**the goal was to build the lightest bridge possible that could still support all the required weight.

**Second place in Green Generation-** The goal for green generation was as follows from the science olympiad rules manual, "Students will demonstrate an understanding of general ecological principles, the history and consequences of human impact on our environment, solutions to reversing trends and sustainability concepts."

**Fifth Place in Disease Detectives-** The goal for disease detectives was as follows, "Students will demonstrate an understanding of general ecological principles, the history and consequences of human impact on our environment, solutions to reversing trends and sustainability concepts."
