

Mrs. Griller's 5th Grade Science Classes

# Wax Museum of Scientists

On October 27, 2023 room 131 at IHS was turned into a Wax Museum. Our 5th grade Scientists researched about a famous scientist that studied one of Earth's Spheres. They then made a plaque with information about the scientist and a replica of one of the tools they used in their studies. Finally they dressed as the scientist and acted like wax figures as other science students came in to tour our museum.
